با این سبک

ld Prompt"}
PROJECT: TEEN STUDIO — PREMIUM CINEMATIC PRODUCTION WEBSITE

Act as a world-class creative director, award-winning UI/UX designer, senior frontend engineer, motion designer, and digital branding specialist.

Your mission is to DESIGN AND BUILD a complete, premium, cinematic, fully responsive website for a professional video production and content creation studio named:

TEEN STUDIO

IMPORTANT: I have uploaded a reference screenshot of a cinematic filmmaking portfolio website. Use that image as the PRIMARY visual reference for the entire website.

Do not simply create a generic agency template.

Recreate the visual language, layout composition, atmosphere, proportions, typography hierarchy, contrast, spacing, and premium cinematic experience of the reference image, while creating a more polished, modern, interactive, and conversion-focused website for TEEN STUDIO.

The final result must feel like the official website of an international filmmaking studio, not a basic business website.

All visible website copy must be written in PROFESSIONAL ENGLISH.

Do not use Persian text anywhere in the website interface.

==========
01. BRAND IDENTITY
==========

Brand Name:

TEEN STUDIO

Industry:
Cinematic Video Production, Filmmaking, Commercial Photography, Creative Content Production, Brand Films, Music Videos, Social Media Content, and Post-Production.

Brand Personality:
- Cinematic
- Sophisticated
- Artistic
- Bold
- Minimalist
- Premium
- Modern
- Emotionally engaging
- Detail-oriented
- Professional

Brand Positioning:

TEEN STUDIO transforms ideas, brands, people, and stories into visually powerful cinematic experiences.

The website should communicate that this is a serious creative studio with a distinctive visual identity, strong filmmaking capabilities, and a high standard of production.

Suggested brand tagline:

"WE DON'T JUST CREATE CONTENT. WE CREATE CINEMATIC EXPERIENCES."

Alternative headline:

"YOUR VISION. OUR LENS. ONE UNFORGETTABLE STORY."

Supporting statement:

"From the first idea to the final frame, we craft cinematic visuals that move people, elevate brands, and make stories impossible to ignore."

Primary conversion goal:
Encourage visitors to contact TEEN STUDIO through WhatsApp, Instagram, Telegram, or the project inquiry form.

Secondary goals:
- Showcase selected work.
- Communicate services clearly.
- Establish trust and creative credibility.
- Encourage visitors to start a project.
- Make the studio's contact information easy to access.

==========
02. DESIGN DIRECTION — FOLLOW THE REFERENCE IMAGE
==========

Use the uploaded reference image as the main visual guide.

Reproduce its overall composition and design language as closely as practical, while adapting all content and branding to TEEN STUDIO.

VISUAL STYLE:

A premium cinematic portfolio featuring:
- Deep black backgrounds.
- Warm ivory and off-white editorial sections.
- Muted bronze and amber accents.
- Dramatic cinematic photography.
- Dark atmospheric overlays.
- Elegant serif headlines.
- Small uppercase sans-serif labels.
- Sophisticated spacing.
- Fine dividing lines.
- Minimal outlines and borders.

- Subtle film grain.
- Restrained motion and transitions.
- Editorial magazine-inspired layouts.
- Carefully balanced negative space.

COLOR PALETTE:

Primary background:
#080808

Secondary background:
#11100F

Warm ivory:
#F3F0E8

Muted gold:
#B88A55

Cinematic amber:
#D18A3A

Secondary text:
#A7A29A

Dark border:
#292622

Use gold and amber sparingly. The website must remain sophisticated, not flashy.

Avoid:
- Bright neon colors.
- Excessive gradients.
- Generic blue-and-purple AI aesthetics.
- Cartoon graphics.
- Oversized rounded cards.

- Excessive glassmorphism.
- Unnecessary floating UI elements.
- Generic corporate illustrations.
- Repetitive stock-template sections.

TYPOGRAPHY:

Use an elegant editorial serif font for major headings, similar in character to:
- Cormorant Garamond
- Playfair Display
- Bodoni-style editorial typography

Use a clean modern sans-serif font for navigation, buttons, labels, body copy, and metadata, such as:
- Inter
- Manrope
- DM Sans

Use uppercase typography, generous letter spacing, and compact text blocks for navigation and section labels.

Major headings should feel cinematic and editorial.

The website must use a consistent typographic system with clearly defined heading sizes, line heights, font weights, and spacing.

==========
03. GLOBAL WEBSITE STRUCTURE
==========

Build a complete single-page cinematic portfolio website with the following sections in this exact order:

1. Navigation
2. Hero / Cinematic Introduction
3. About the Studio

4. Services
5. Selected Work / Portfolio
6. Creative Process
7. Why Choose TEEN STUDIO
8. Testimonials
9. Contact / Start a Project
10. Footer

All sections must feel visually connected and use the same design system.

The page should be long enough to tell a compelling visual story but should not feel unnecessarily crowded.

Use a mixture of dark and warm ivory sections, closely following the rhythm of the uploaded reference.

==========
04. NAVIGATION BAR
==========

Create a premium, minimal navigation bar.

Layout:
- TEEN STUDIO wordmark on the left.
- Navigation links centered or aligned across the top.
- An outlined "START A PROJECT" button on the right.
- A minimal hamburger menu on the far right when appropriate.

Brand wordmark:
TEEN STUDIO

Style the logo as elegant typography rather than a generic icon.

Suggested logo treatment:
TEEN
STUDIO

The second line can be smaller, uppercase, and widely letter-spaced.

Navigation links:

HOME
ABOUT
SERVICES
WORK
PROCESS
CONTACT

Behavior:
- Smooth-scroll to each section.
- Highlight the active navigation section when practical.
- Keep the navigation elegant and unobtrusive.
- Add a subtle transparent-to-dark background transition when scrolling.
- Make the primary CTA visible without overwhelming the header.
- Implement a functional mobile navigation menu.
- Close the mobile menu after selecting a section.

The header must work correctly on desktop, tablet, and mobile.

==========
05. HERO SECTION — CINEMATIC FIRST IMPRESSION
==========

This is the most important section of the website.

Create a cinematic, full-width hero section that closely matches the composition and atmosphere of the reference image.

DESKTOP LAYOUT:

Use a wide cinematic background image covering the entire hero section.

The background should depict a professional filmmaker standing beside a cinema camera on a tripod in a dramatic production environment.

Visual characteristics:
- A filmmaker seen in silhouette.
- A professional cinema camera.
- Warm tungsten backlighting.
- Deep shadows.
- Atmospheric haze.
- Subtle film grain.
- Strong cinematic contrast.
- Realistic environmental lighting.
- A premium film-production atmosphere.

The image should feel like a frame from a professionally shot feature film.

Use a high-quality cinematic image with a wide landscape composition.

Apply a dark gradient overlay to ensure all text remains readable.

LEFT SIDE:

Small eyebrow text:
STORIES WORTH TELLING

Main headline with deliberate line breaks:

WE FRAME
EMOTIONS.
YOU FEEL
THE STORY.

Highlight "THE STORY." in muted amber or cinematic gold.

Supporting descriptor:

FILMMAKING · STORYTELLING · VISUAL PRODUCTION

Short introduction:

"We turn ideas into powerful visual stories, crafted with intention and finished with cinematic precision."

Primary button:
WATCH OUR SHOWREEL

Secondary button:
EXPLORE OUR WORK →

Place a minimal circular play icon next to the showreel button.

The showreel button must trigger a functional video modal when a valid showreel video URL has been configured.

If no showreel URL is configured, use a clearly defined placeholder configuration and do not create a broken player.

RIGHT SIDE:

Add a refined vertical information area containing three short brand statements:

CINEMATIC VISUALS
BUILT WITH PURPOSE

STORIES
THAT MOVE PEOPLE

DETAILS
THAT MAKE THE DIFFERENCE

Keep these statements understated, aligned vertically, and visually similar to the award labels in the reference screenshot.

Do not invent awards, festival selections, client logos, or professional achievements.

BOTTOM OF HERO:

Include subtle slide indicators such as:

01 / 03

Include a small scroll indicator.

If multiple hero slides are implemented, every slide must have working navigation and accessible controls.

Use subtle transitions rather than aggressive autoplay effects.

HERO HEIGHT:

Approximately 80–90vh on desktop, adjusted to create the same dramatic impact as the reference image.

On mobile, optimize the image crop, headline size, and CTA placement.

==========
06. ABOUT THE STUDIO SECTION
==========

Create a warm ivory section inspired by the second section of the reference screenshot.

The section should contrast beautifully with the dark hero.

Use a two-column layout.

LEFT COLUMN:

Display a cinematic portrait of a filmmaker or creative director in a realistic filmmaking environment.

Use a wide rectangular image with subtle distressed-film-edge styling or a restrained editorial frame.

Do not use a generic corporate headshot.

RIGHT COLUMN:

Small section label:

BEHIND THE LENS

Headline:

WE DON'T JUST MAKE VIDEOS.
WE CRAFT EXPERIENCES.

Body copy:

"TEEN STUDIO is a creative production studio focused on cinematic storytelling, distinctive visuals, and meaningful content.

From concept development to the final edit, we bring ideas to life through thoughtful direction, precise cinematography, and a commitment to visual quality.

Every project is an opportunity to create something that feels different, looks exceptional, and stays with its audience."

Add four compact studio highlights:

CREATIVE DIRECTION
A clear vision behind every frame.

VISUAL STORYTELLING
Ideas shaped into compelling narratives.

ATTENTION TO DETAIL
Every shot, cut, and color has a purpose.

END-TO-END PRODUCTION
One creative process, from concept to delivery.

Add a button:

DISCOVER OUR APPROACH →

The button should scroll to the creative process section.

Do not fabricate years of experience, numbers of completed projects, awards, client counts, or satisfaction statistics.

Use real, qualitative selling points instead of invented numerical achievements.

BACKGROUND DETAILS:

Add a subtle, low-opacity cinematic landscape image or photographic texture toward the right edge of the section.

Keep the image extremely subtle so it does not compete with the text.

==========
07. SERVICES SECTION
==========

Create a full-width dark section.

Section number:
02

Vertical side label:
WHAT WE DO

Main heading:

CREATIVE SERVICES.
CINEMATIC RESULTS.

Supporting copy:

"From the first spark of an idea to the final frame, we create visuals designed to capture attention and communicate with purpose."

Display six service items in a refined horizontal grid on desktop.

Each item should include:
- A minimal line icon.
- A service title.
- A short description.
- A subtle hover animation.
- A thin divider or understated border.

SERVICE 01 — VIDEO PRODUCTION

"From concept to final cut, we produce compelling videos built around your vision, audience, and goals."

SERVICE 02 — CINEMATOGRAPHY

"Carefully composed frames, intentional camera movement, and cinematic lighting that bring every story to life."

SERVICE 03 — COMMERCIAL & BRAND FILMS

"Premium visual content that communicates your brand's identity, values, and ambition."

SERVICE 04 — MUSIC VIDEOS

"Distinctive visual concepts, atmospheric imagery, and expressive storytelling for artists and

musicians."

SERVICE 05 — SOCIAL MEDIA CONTENT

"High-quality reels, promotional videos, and short-form content designed for modern digital platforms."

SERVICE 06 — EDITING & COLOR GRADING

"Precise editing, thoughtful pacing, cinematic color, and polished finishing that unify every frame."

OPTIONAL ADDITIONAL SERVICES:

Include these only if the layout supports them naturally:

- Event Filmmaking
- Product Photography
- Creative Campaigns
- Behind-the-Scenes Content
- Interview Production
- Motion Graphics

All service items must be responsive.

Use elegant line icons with a muted gold treatment.

Avoid generic oversized icon cards.

The visual presentation should feel like a premium creative studio portfolio.

==========
08. SELECTED WORK — CINEMATIC PORTFOLIO
==========

Create a portfolio section inspired by the selected films grid in the reference image.

Use a black background.

Section number:
03

Vertical label:
SELECTED WORK

Heading:

A SELECTION OF OUR WORK.

Supporting copy:

"Every project has a story. These are some of the ways we bring those stories to life."

Create a cinematic grid with six portfolio projects.

Use a balanced layout with six image cards across two rows on desktop or a carefully designed horizontal filmstrip if appropriate.

Each project card should include:
- A large cinematic thumbnail.
- Project title.
- Project category.
- Year, only when configured.
- A subtle play button or view-project interaction.
- A refined hover state.
- Optional short project description.

Create editable sample portfolio entries:

PROJECT 01
Title: BEYOND THE FRAME
Category: Cinematic Film

PROJECT 02
Title: STORIES IN MOTION
Category: Brand Film

PROJECT 03
Title: AFTER THE LIGHT
Category: Visual Storytelling

PROJECT 04
Title: CITY OF SILENCE
Category: Commercial Film

PROJECT 05
Title: SOUND & VISION
Category: Music Video

PROJECT 06
Title: THE HUMAN MOMENT
Category: Documentary Film

These titles are placeholder project names for the initial website layout. Make all portfolio content easy to replace with real projects.

Do not falsely imply that these sample projects are verified client commissions or completed productions by TEEN STUDIO.

Use cinematic thumbnail images with different compositions and visual moods.

Suggested image subjects:
- Dramatic mountain landscapes.
- A moody portrait.
- A close-up of a person in natural window light.
- A cinematic urban street.
- A musician or performer.
- A solitary figure in a vast landscape.

Maintain a coherent color grade across all thumbnails.

INTERACTION:

When a visitor clicks a project, open a polished project detail modal or dedicated project detail view.

Where configured, the project detail view should support:
- Project title.
- Project category.
- Description.
- Hero image or video.
- Optional gallery.
- Optional production credits.

Include a button:

VIEW ALL PROJECTS →

If a full portfolio page is not implemented, make the button scroll to the complete project grid or open an accessible portfolio overlay.

Do not leave dead links or nonfunctional buttons.

==========
09. CREATIVE PROCESS SECTION
==========

Create a warm ivory section with cinematic photography on the right.

Section number:
04

Vertical label:
OUR PROCESS

Heading:

FROM THE FIRST IDEA
TO THE FINAL FRAME.

Supporting copy:

"Great visuals don't happen by accident. Every project follows a thoughtful creative process built around clarity, collaboration, and craft."

Create a horizontal five-step process timeline on desktop.

STEP 01 — DISCOVER

"We learn about your vision, audience, goals, and creative direction."

STEP 02 — CONCEPTUALIZE

"We shape the idea into a clear visual concept, treatment, and production plan."

STEP 03 — PRODUCE

"We bring the concept to life through cinematography, lighting, direction, and production."

STEP 04 — EDIT & REFINE

"We shape the footage through editing, sound design, color grading, and detailed refinement."

STEP 05 — DELIVER

"We prepare the final content in the agreed formats, ready for its intended platform."

Each step should have:
- A numbered circular marker.
- A thin connecting line.
- A clear heading.
- A concise description.

Use a beautiful behind-the-scenes image of a cinema camera or production monitor on the right side.

On mobile, transform the horizontal timeline into a clean vertical timeline.

Use subtle scroll-triggered animations.

==========
10. WHY CHOOSE TEEN STUDIO
==========

Add a visually sophisticated dark section.

Heading:

MORE THAN A PRODUCTION.
A CREATIVE PARTNERSHIP.

Body copy:

"We believe exceptional content begins with understanding the story behind the brief.

Our approach combines creative thinking, intentional cinematography, and careful post-production to create work that feels cohesive, distinctive, and purposeful."

Create four editorial feature blocks:

01 — A CLEAR CREATIVE VISION

"Every project starts with a direction, not just a camera."

02 — CINEMATIC ATTENTION TO DETAIL

"We pay attention to composition, light, movement, pacing, and atmosphere."

03 — COLLABORATIVE BY DESIGN

"Your ideas and objectives remain central throughout the creative process."

04 — QUALITY THROUGH EVERY FRAME

"From the first concept to the final export, every stage contributes to the finished experience."

Use asymmetrical composition, fine borders, subtle gold details, and sophisticated typography.

Avoid exaggerated claims or unsupported promises.

==========
11. TESTIMONIALS SECTION
==========

Create a dark editorial testimonial section inspired by the reference screenshot.

Section number:
05

Vertical label:
KIND WORDS

Heading:

GOOD WORK.
MEANINGFUL CONNECTIONS.

Design:
- Three testimonial columns on desktop.
- Elegant quotation marks.
- Compact text blocks.
- Minimal author metadata.
- Subtle carousel navigation if a carousel is used.

IMPORTANT:
Do not invent testimonials from real people or fabricate client names, company names, photographs, or endorsements.

For the initial design, use clearly labeled editable placeholder testimonials.

Suggested placeholder:

"Working with TEEN STUDIO made the creative process feel clear, collaborative, and focused on the final vision."

Author:
[Client Name]

Role:
[Client Role / Brand]

Mark these entries internally as sample content so they can be replaced before launch.

If no real testimonials have been supplied, provide an easy way to hide this section entirely.

==========
12. CONTACT SECTION — START A PROJECT
==========

This is the primary conversion section.

Use a warm ivory background with a cinematic production photograph.

Create a two-column layout.

LEFT COLUMN:

Small label:
06 — GET IN TOUCH

Main headline:

LET'S CREATE
SOMETHING UNFORGETTABLE.

Supporting copy:

"Have a project in mind? Tell us what you're imagining, and let's explore how we can bring it to life."

CONTACT DETAILS:

WhatsApp:
+98 933 285 6442

Instagram:
@amirsabokrou

Telegram:
@amirsabokrouu

Use clean line icons.

Make each contact method clickable.

WHATSAPP IMPLEMENTATION:

Use this destination:

https://wa.me/989332856442

Open the link in a new tab.

Where appropriate, prefill the message with:

"Hello TEEN STUDIO! I'd like to discuss a new project."

INSTAGRAM IMPLEMENTATION:

Use this destination:

https://www.instagram.com/amirsabokrou/

Open the profile in a new tab.

TELEGRAM IMPLEMENTATION:

Use this destination:

https://t.me/amirsabokrouu

Open the profile in a new tab.

RIGHT COLUMN:

Create a premium dark contact form card with a thin border and a restrained shadow.

Card heading:

TELL US ABOUT YOUR PROJECT.

Supporting text:

"Share a few details and we'll have a better understanding of what you need."

FORM FIELDS:

1. Full Name
2. Email Address
3. WhatsApp Number
4. Project Type
5. Estimated Budget
6. Preferred Project Date

7. Project Description

PROJECT TYPE OPTIONS:

- Commercial Video
- Brand Film
- Music Video
- Social Media Content
- Event Filmmaking
- Cinematography
- Editing & Color Grading
- Photography
- Other

BUDGET OPTIONS:

- Let's Discuss
- Entry-Level Project
- Mid-Range Project
- Premium Production
- Custom Budget

Do not display invented prices.

FORM BUTTON:

SEND PROJECT INQUIRY →

FORM BEHAVIOR:

Implement real form validation.

Validate required fields and email formatting.

Display accessible loading, success, and error states.

Do not show a false success message if submission fails.

Connect the form to a supported Base44 backend workflow or database if available.

Store submissions securely and only collect the information necessary to handle project inquiries.

Do not expose submissions publicly.

If a working email or backend integration has not been configured, provide a functional WhatsApp-based fallback that prepares a message containing the form details and opens the WhatsApp conversation.

Clearly explain in the implementation which submission method is active.

Add a secondary CTA below the form:

PREFER WHATSAPP? LET'S TALK →

This should open the WhatsApp contact link.

IMPORTANT:
The WhatsApp, Instagram, and Telegram contact methods must work correctly on desktop and mobile.

==========
13. FOOTER
==========

Create a sophisticated black footer.

LEFT:

TEEN STUDIO

Short brand description:

"Cinematic storytelling. Intentional visuals. Creative work that stays with you."

CENTER:

QUICK LINKS

Home
About
Services
Work
Process
Contact

RIGHT:

FOLLOW OUR WORK

Instagram
Telegram
WhatsApp

Use the correct links configured above.

Add a restrained row of social icons.

Include a subtle decorative circular studio seal or typographic monogram.

Do not use an invented award badge.

BOTTOM COPYRIGHT:

"© [CURRENT YEAR] TEEN STUDIO. ALL RIGHTS RESERVED."

The year should update dynamically.

==========

14. IMAGE DIRECTION

Images are a critical part of the design.

Use cinematic, realistic photography that matches the reference screenshot.

Image direction:
- Film production environments.
- Professional cinema cameras.
- Directors and cinematographers.
- Moody portraits.
- Warm tungsten lighting.
- Natural window light.
- Dramatic landscapes.
- Urban night scenes.
- Music performance environments.
- Documentary-style imagery.
- Behind-the-scenes production moments.

Color treatment:
- Deep blacks.
- Warm highlights.
- Muted shadows.
- Subtle film grain.
- Restrained contrast.
- Cohesive cinematic color grading.

Image selection must feel intentional rather than random.

Use different images for different sections while maintaining a consistent visual identity.

Avoid repeating the same image throughout the website.

Use appropriate high-quality image sources or generated visual assets.

Do not use broken image URLs.

If an image source is unavailable, replace it with a valid image rather than leaving an empty placeholder.

Apply lazy loading to images below the fold.

Provide descriptive alt text.

Use appropriate image aspect ratios and object positioning.

==========
15. ANIMATION & INTERACTION DESIGN
==========

Implement subtle, premium motion design.

The animations should feel inspired by a high-end filmmaking studio portfolio.

Include:

1. Smooth scrolling between sections.
2. Elegant navigation transitions.
3. Subtle fade-in and upward movement for section content.
4. Staggered appearance of service items.
5. Gentle image zoom on portfolio hover.
6. Underline or color transitions on links.
7. Refined button hover animations.
8. A smooth mobile menu transition.
9. Accessible project detail modals.
10. A polished showreel video modal.
11. A subtle scroll indicator in the hero.
12. A restrained active-section indicator.

Use animation timing that feels natural and cinematic.

Avoid:
- Excessive parallax.
- Constant movement.
- Aggressive zooming.
- Distracting particle effects.
- Long loading animations.
- Forced scrolling.
- Autoplay audio.
- Unnecessary cursor-following effects.

Respect the user's reduced-motion accessibility preference.

Animations must not prevent interaction or make the site feel slow.

==========
16. RESPONSIVE DESIGN
==========

The website must be fully responsive.

DESKTOP:
Use wide editorial layouts, dramatic image compositions, multiple-column sections, and generous whitespace.

TABLET:
Adapt columns, typography, image ratios, and section spacing.

MOBILE:
Create a premium mobile experience rather than simply shrinking the desktop layout.

Mobile requirements:
- Compact navigation with a working hamburger menu.
- Readable hero headline.
- Correct cinematic image cropping.
- Touch-friendly buttons.
- Stacked service items.

- Responsive portfolio cards.
- Vertical creative process timeline.
- Readable contact form.
- Clickable WhatsApp, Instagram, and Telegram links.
- No horizontal overflow.
- No overlapping text.
- No clipped navigation.
- No excessively small typography.
- No oversized images that push essential information too far down.

Test at approximately:
- 375px width
- 390px width
- 430px width
- 768px width
- 1024px width
- 1440px width
- 1920px width

The design must remain visually coherent at every size.

==========
17. TECHNICAL IMPLEMENTATION
==========

Build the actual website, not just a visual mockup.

Use the existing Base44-supported framework, components, routing, database features, and integrations.

Do not assume unsupported packages or services are installed.

Implementation priorities:

- Reusable components.
- Clean component structure.

- Consistent design tokens.
- Semantic HTML.
- Accessible navigation.
- Keyboard-accessible buttons and modals.
- Proper form labels.
- Appropriate color contrast.
- Responsive layouts.
- Optimized image loading.
- Reliable external links.
- Functional buttons.
- Clear error handling.
- No unnecessary dependencies.
- No console errors.
- No broken routes.
- No dead-end interactions.

Create reusable components for:
- Navigation
- Hero
- Section headings
- Service items
- Portfolio cards
- Project detail modal
- Process timeline
- Testimonials
- Contact form
- Footer

Store repeated content in structured arrays or configuration objects where appropriate.

Keep the content easy to update without redesigning the entire website.

Use the actual Base44 environment and its available features.

If the platform supports a database, use it only where necessary for genuine functionality, such as private project inquiry submissions.

Do not create unnecessary authentication requirements for public website visitors.

Do not build an admin dashboard unless it is necessary and supported.

==========
18. SEO & SOCIAL SHARING
==========

Configure the website for professional search presentation.

Suggested page title:

TEEN STUDIO | Cinematic Video Production & Creative Filmmaking

Suggested meta description:

"TEEN STUDIO is a creative production studio specializing in cinematic video production, brand films, music videos, social media content, and professional post-production."

Include:
- Semantic heading hierarchy.
- Descriptive image alt text.
- Appropriate page metadata.
- Open Graph title.
- Open Graph description.
- Social sharing image configuration.
- A branded favicon or typographic monogram.
- A canonical URL setting that can be configured once the production domain is known.

Do not invent a domain name.

Do not include fabricated ratings, awards, reviews, or business credentials in structured data.

==========
19. PERFORMANCE & ACCESSIBILITY

==========

Optimize the website for real-world use.

Requirements:
- Compress and appropriately size images.
- Avoid unnecessary heavy animations.
- Lazy-load below-the-fold images.
- Prevent layout shifts where practical.
- Use semantic landmarks.
- Ensure visible keyboard focus.
- Provide accessible labels for icon-only buttons.
- Ensure sufficient text contrast.
- Support reduced-motion preferences.
- Make modals keyboard-accessible.
- Ensure all interactive controls work with a keyboard.
- Avoid autoplay audio.
- Keep the website fast on mobile connections.

==========
20. FINAL QUALITY CONTROL
==========

Before considering the website complete, review the entire implementation.

Verify that:

1. The website follows the uploaded reference image closely.
2. The visual design feels premium, cinematic, and cohesive.
3. The brand name is TEEN STUDIO everywhere.
4. All website copy is in English.
5. The color palette matches the requested dark and ivory aesthetic.
6. The hero section makes a strong first impression.
7. All requested sections exist.
8. All six services are present.
9. All six sample portfolio entries are present and editable.

10. Placeholder projects are not misrepresented as verified client work.
11. Testimonials are clearly treated as placeholders until replaced.
12. No fictional awards or statistics are presented as real.
13. The WhatsApp link opens the correct conversation.
14. The Instagram link opens @amirsabokrou.
15. The Telegram link opens @amirsabokrouu.
16. The contact form validates its inputs.
17. Form submissions follow a real, clearly configured submission path.
18. All navigation links work.
19. The mobile navigation opens and closes correctly.
20. The portfolio interactions work.
21. The showreel button has a valid configured behavior.
22. There are no broken images.
23. There are no dead buttons.
24. There is no horizontal overflow on mobile.
25. The layout works across desktop, tablet, and mobile.
26. The website respects reduced-motion preferences.
27. The footer copyright year updates dynamically.
28. There are no obvious console errors.
29. The page uses consistent spacing and typography.
30. The final result looks like a real international creative studio website.

==========
FINAL CREATIVE DIRECTION
==========

Think of the visual identity as a combination of:

- An independent film production studio.
- A premium cinematographer's portfolio.
- A cinematic editorial magazine.
- A modern creative agency.
- A refined luxury brand experience.

The reference image must guide the visual composition, especially the cinematic hero, alternating dark and ivory sections, vertical section labels, editorial typography, film portfolio grid, process

timeline, and premium contact area.

However, improve the overall experience through stronger responsive behavior, more polished spacing, more coherent typography, functional interactions, and a clearer path to contacting the studio.

Do not return only a plan, a wireframe, or a design description.

BUILD THE COMPLETE WEBSITE.

Start by implementing the actual page and its reusable components. Then test the responsive layouts, interactions, links, and form behavior.

The final result should be visually impressive, functional, and ready for TEEN STUDIO's real content t

KARAN MEHTA
Marketing Head, Elevate Brands

“Working with Arjun was seamless. He's not just a filmmaker, he's a storyteller at heart.”

NEHA DUBEY
Independent Artist
